

EMERY WINSLOW PRODUCT LINE

Industrial Scales for Difficult Environments: Hydrostatic Floor and Bench Scale

WEIGH SQUARE 737-S

Flexure Bench Scale - 304 Stainless Steel

- 10"x10" to 36"x36" sizes, up to 4,000-lb capacity
- Field Repairable Hydrostatic load cell (NTEP approved)
- Load cells can be rebuilt in the field in about 20-minutes
- No need to re-calibrate after a rebuild
- 1:1 Ratio for flexures provide superior load cell overload protection
- IMMUNE to water and transient voltages
- Available with "double-enclosed" instrument option
- All components are Made in the USA

EASY CLEAN 708-Series Floor Scale

Above Ground - Stainless Steel

- 36"x36" to 60"x84" sizes, up to 10,000-lb capacity
- Field repairable Hydrostatic load cells (NTEP approved)
- Load cells can be rebuilt in the field in about 20-minutes
- No need to re-calibrate after a rebuild
- Multiple lift options, lift off, gas cylinders or pneumatic lifts
- Top plate can be Stainless steel, Polypropylene or Fiberglass
- IMMUNE to water and transient voltages
- Non-Electric at scale site - ideal for explosive environments
- All components are Made in the USA

708 with optional tread plate top, and gas lifting cylinders

EASY CLEAN 709-Series Floor Scale

Pit Type - Stainless Steel

- 48"x48" to 60"x84" sizes, up to 15,000-lb capacity
- Field repairable Hydrostatic load cells (NTEP approved)
- Load cells can be rebuilt in the field in about 20-minutes
- No need to re-calibrate after a rebuild
- Multiple deck lift options, gas cylinders or pneumatic lifts
- Top plate can be, Stainless steel, Polypropylene or Fiberglass
- IMMUNE to water and transient voltages
- Non-Electric at scale site - ideal for explosive environments
- All components are Made in the USA

We also offer:

Electronic Load cell Bench and Floor Scales

- Sentionics 65023A brand load cells
- NTEP approved scales and load cells
- Capacities from 1000 to 40,000-lbs
- Mild steel or Stainless steel construction
- Very competitively priced
