

ROADWEIGH TRUCK SCALES ABOVE GROUND – STEEL or CONCRETE DECK

Series 84SD- and 84CD- Vehicle Scales

100-ft ROADWEIGH-Steel Deck truck scale with optional Guide-Rails

Hydrostatic weighing systems give you the piece of mind that each and every day your scale will be operating and monitoring your in-process cash flow. The load cells on these Hydrostatic truck scales are **IMMUNE** to lightning and water damage, so when you have a truck load that costs thousands of dollars per weighing cycle, why would you even think about trusting the "low-bid" product. Get a scale that will last you for decades.

It doesn't take much to make the "boss" unhappy in these difficult times, so pick the most reliable scales made today for your critical weighing application sites.
